EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Monaco on October 27, 2004.

The application has been amended as follows:

As to claim 73, line 2, change "the housing" to - - a housing - -.

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 43-60 is the inclusion of a transfer belt support unit including a transfer belt hingedly attached to the image forming apparatus at a lower end position of the transfer belt support unit and movable between a first position covering the plurality of image forming cartridges and a second position uncovering the plurality of image forming cartridges, wherein each of the image forming cartridges is configured to be mounted to or dismounted from the image forming apparatus when the transfer belt support unit is in the second position. This is found in all of claims 43-60, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 61-69 is the inclusion of a means for supporting a transfer belt, including a transfer belt, being hingedly attached to an image

forming apparatus at a lower end position of the transfer belt supporting means and movable between a first position covering the plurality of the image forming means and a second position uncovering the plurality of the image forming means, wherein each of the image forming means is configured to be mounted to or dismounted from the image forming apparatus when the transfer belt supporting means is in the second position. This is found in all of claims 61-69, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 70-76 is the inclusion of a method of passing the plurality of light beams through corresponding slots of a vertical stay; receiving on each of a plurality of image forming cartridges a respective one of the plurality of light beams which have passed through the corresponding slots of the vertical stay; and transferring the toner image to a transfer medium on a transfer belt housed in a transfer belt support unit including at least an upper roller and a lower roller around which the transfer belt moves, the transfer belt support unit being hingedly attached to an image forming apparatus at a lower end position of the transfer belt unit and movable between a first position covering the plurality of the image forming cartridges and a second position uncovering the plurality of the image forming cartridges, wherein each of the image forming cartridges is configured to be mounted to or dismounted from the image forming apparatus when the transfer belt support unit is in the second position. This is found in all of claims 70-76, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
